STRAWBERRIES.

SENATOR DUNLAP (per)—Has a perfect blossom, is hardy, productive, of good quality. splendid keeper, and is able to hold its own under any rough and tumble methods of culture, free from rust. The plant is wonderfully productive and brings every berry to maturity. It resembles the Warfield in size and color, ripens at the same time and remains in bearing longer. When canned it's one of the richest varieties known. To produce a full crop it needs no other variety planted with it. It stands today the leading market berry among all the fruit growers. Large strawberry growers are planting heavily to Dunlap, often planting ten to twenty acres solid to this variety, which goes to show the confidence this berry has created since its introduction about fifteen years ago and our advice would be to plant the Dunlap. It won't disappoint you.

DR. BURRILL (Per)—This is a new variety introduced a few years ago by the Kellogg Co., of Three Rivers, Mich., and originated by Dr. Reasoner of Illinois. The introducer claims it is a scientific cross of Senator Dunlap and the Crescent, commences to ripen early and extends over a long season. This is one of the best all round berries on our list.

THE EVERBEARING PROGRESSIVE (Per)—Progressive are the earliest of all berries, also the latest, as it bears from very early summer until hard freezing weather. You have a combination of the earliest and the latest, sweetest and the most productive. If you have missed this every season don't do so again.

A good time to plant grape vines is in the fall. Get our prices in September for fall planting.

**Certificate of Inspection
accompanies each shipment**
